

## We Need Your Help!

We are raising funds to accomplish upgrades and enhancements at the Stanley Museum, including improving existing structures/foundations and building a replica of the historic "Clerks Cabin" staff house.

## Project Description

**Phase I:** The oldest building at the Museum complex, the garage/office, built in 1929, needs restoration. It requires a new foundation, subfloor bracing, roof repairs, exterior log maintenance, and improved chinking. In addition, a 1980's non-historic addition must be removed prior to repairs. This structure was originally a small garage and telephone switchboard; later it was turned into the Ranger's office. When fully restored, the building will serve as the SIHA office and book room.

**Phase II:** Construct a replica of the historic "Clerks Cabin" that was on the site from the 1940's - 1960's as housing for the Stanley Ranger District Clerk when the present museum was the Valley Creek Ranger Station. The new building will be designed to look like the old Clerks Cabin and be placed on the same historic location behind the Ice House/Toolshed. The replicated building will serve as housing for up to four SIHA summer interns and reduce dependency on the Forest Service for Naturalist housing. Boise State University's School of Engineering Department of Construction Management will support the project thus providing training for students and lower-costs for SIHA.
